Accomplishments

All projects listed below were developed by me.

- Built personal portfolio website using plain HTML, CSS, JavaScript, Grid.
- Created Bookshelf app with React and third-party API.
- Created Would You Rather app with React, Redux and third-party API.

BIO

I have over 2.5 years of experience as a Front End Developer. I started my career as an intern in a digital agency by developing fully functional responsive websites for a wide variety of businesses. I gained a lot of knowledge and experience working in a fast-paced environment. I am excited to move deeper into programming, build apps rather than websites, and I love using the latest technologies. I'll be happy to get on board with a React front-end developers team who value clean quality code. While I love JavaScript and React, I am also a passionate learner and always willing to learn new frameworks and languages.

Work Experience

- Nika Digital Agency, Sep 2017 - July 2020

Responsible for developing fully functional responsive websites. Created more than 20 websites and landing pages with HTML5, CSS3, Javascript, jQuery, PHP and Wordpress. Created and maintained front-end code and documentation standards. Responsible for optimizing images and minifying CSS and JavaScript. Cross-Browser development. Responsive and Mobile design.
